1. In June 1972, [REDACTED]

STAT

[REDACTED] published intelligence  
Report [REDACTED]

STAT

[REDACTED] The authors now request permission  
to submit copies of this report to several professional  
journals in economics for possible publication.

2. The Agency publication of this report was  
classified "Confidential." The authors suggest that the  
classification be removed. The report contains no classified  
data and uses no classified source material, nor is it based  
on a methodology unique to CIA. Further, it was originally  
planned to publish the report as an unclassified Agency  
study. However, because the US-USSR discussions on the  
environmental treaty had recently concluded, the DCI felt  
that the report should not be published in an unclassified  
form for general distribution. (See attached letter of 26  
May 1972 from Assistant Deputy Director for Intelligence  
to D/OER.) As it has now been several months since the  
conclusion of the environmental treaty, the issues dealt  
with in the paper no longer are sensitive, and the reason  
for classification no longer exists.
